

Kruiden zaaien

| | | |
|-----------------|------------------------------|---------------|
| Basilicum | mei/juni/juli | buiten zaaien |
| Bieslook | april/mei/juni/juli/augustus | buiten zaaien |
| Blad peterselie | april/mei/juni/juli | buiten zaaien |
| Blad selderij | april/mei/juni/juli | buiten zaaien |
| Munt | mei/juni/juli/augustus | buiten zaaien |
| Oregano | mei/juni | buiten zaaien |
| Rozemarijn | mei/juni | buiten zaaien |
| Tijm | mei/juni/juli | buiten zaaien |

Als je kruiden direct in een grote pot of in de volle grond buiten zaait hoef je ze niet te verpoten. Hoe meer je knipt hoe harder ze groeien.

Verzorging

De meeste kruiden houden niet van veel water of natte aarde. Dus begiet ze niet teveel, 2 keer per week is voldoende. Hou de aarde net vochtig.

Basilicum is hierop een uitzondering, die houdt juist van vochtige potgrond. Dus die geef je om de dag een beetje water.

Zet de potten met kruiden op een licht plekje, ze houden wel van zon maar niet de hele dag.

Behalve de...Basilicum die houdt juist veel van zonneschijn, let bij langdurig warm weer goed op dat de plant niet uitdroogt.

Groenten zaaien

Radijs

| | |
|---------------|-----------------|
| Zaaien buiten | april/september |
| Plant afstand | 5 cm |
| Kiemen | na 10 dagen |
| Oogsten | na 40 dagen |

Rode bieten

| | |
|---------------|-------------|
| Zaaien buiten | maart/april |
| Plant afstand | 20 cm |
| Kiemen | na 15 dagen |
| Oogsten | na 85 dagen |

Knolvenkel

| | |
|---------------|--------------------|
| Zaaien buiten | half mei/half juli |
| Plant afstand | 20 cm |
| Kiemen | na 15 dagen |
| oogsten | na 75 dagen |

Pompoenen

| | |
|---------------|--------------|
| Zaaien buiten | mei |
| Plant afstand | 80 cm |
| Kiemen | na 20 dagen |
| oogsten | na 140 dagen |

Wortels

| | |
|---------------|----------------|
| Zaaien buiten | april/mei/juni |
| Plant afstand | 20 cm |
| Kiemen | na 15 dagen |
| oogsten | na 120 dagen |

Tomaten

| | |
|---------------|--------------|
| Zaaien buiten | mei |
| Plant afstand | 45 cm |
| Kiemen | na 10 dagen |
| oogsten | na 130 dagen |

Sowing herbs

| | | |
|----------|--|----------------|
| Basil | May / June / July | Sowing outside |
| Chives | April / May / June / July / August Sow | Sowing outside |
| Parsley | April / May / June / July Sow | Sowing outside |
| Celery | April / May / June / July Sow | Sowing outside |
| Currency | May / June / July / August Sow | Sowing outside |
| Oregano | May / June Sow | Sowing outside |
| Rosemary | May / June Sow | Sowing outside |
| Thyme | May / June / July Sow | Sowing outside |

If you sow herbs directly into a large pot or in the ground outside you do not have to re pot them. The more you cut off the more they grow.

How to take care of your herbs

Most herbs do not like a lot of water or wet soil. So do not water them too much, 2 times a week is sufficient. Keep the soil just moist.

Basil is an exception, it thrives in watery soil. So you give it a little water every other day.

Put the pots with herbs in a light spot, they do like sun but not whole day long.

Besides the ... Basil just loves a lot of sunshine! But watch out during prolonged hot weather that the plant does not dry out.

How to sow vegetables

Radish

| | |
|--------------------|------------------------------------|
| Sow indoors (pots) | April (outside half May/September) |
| Planting distance | 5 cm |
| Germinate | after 10 days |
| Harvest | after 40 days |

Beets

| | |
|--------------------|------------------------------------|
| Sow indoors (pots) | March / April - (outside half May) |
| Planting distance | 20 cm |
| Germinate | after 15 days |
| Harvest | 85 days |

Fennel

| | |
|-------------------|--------------------|
| Sow outside | mid May / mid-July |
| Planting distance | 20 cm |
| Germinate | after 15 days |
| Harvest | after 75 days |

pumpkins

| | |
|-------------------|----------------|
| Sow outside | May |
| Planting distance | 80 cm |
| Germinate | after 20 days |
| Harvest | after 140 days |

Carrots

| | |
|--------------------|--------------------------------------|
| Sow indoors (pots) | April (move outside half May / June) |
| Planting distance | 20 cm |
| Germinate | after 15 days |
| Harvest | after 120 days |

Tomatoes

| | |
|-------------------|-------------------------------|
| Sow inside (pots) | March (move outside half May) |
| Planting distance | 45/60 cm |
| Germinate | after 10 days |
| Harvest | after 130 days |
